WORKSHOP OF THE BALTIC SMART CITY AREAS, DAY 1

The energy-efficient urban renewal – Transition Kohtla-Järve

April 1, 2020 at 10

Cultural centre, Keskallee 36, Kohtla-Järve

The workshop aims at providing new insights and reflections on urban energy policy at urban district scale. The event will be structured around two main focus areas:

- Concept and practices of energy improvement district developed in the AREA 21 project assessing feasibility and pivotal renovation schemes exemplified by Kohtla-Järve;
- Discussing and reflecting on experiences in preserving the urban milieu faced with shrinkage and weak housing market, still reaching energy policy objectives in the framework of urban regeneration.

AGENDA

10:00	Welcome coffee and tea
10:30	Welcome by mayor Ljudmila Jantshenko (City of Kohtla-Järve)
	The concept of energy improvement districts of AREA 21 – Jonas Fischer (Hafencity University)
10:50	Urban renewal of the Järve urban district – Jana Viital (City of Kohtla-Järve)
11:10	Housing, planning and renovation – Dmitri Moskovtsev (Ministry of Economy and Communication)
11:30	Renovation schemes and practices of the Järve district – Aivo Raud (Zoroaster), Tõnu Tiit (Termopilt)
11:50	Positions, discussion and outcomes on renovation of historic housing stock outcomes (stakeholders)
12:30	Networking lunch
13:15	Touring and visits in the Järve urban district visit (low energy gymnasium etc), the coach provided, 1h

The target group of this workshop are local authorities, urban stakeholders starting from energy operators ending with citizens. The event aims to bring together urban and energy experts, public authorities, housing sectors, other practitioners and citizens to address district-scale urban renewal.

Workshop languages are Estonian and English (headset translation provided)
